- **Liam Roy - Crowdfunding Application**  
Instagram Client  
liamroy62@gmail.com

## INTERESTS

## EXPERIENCE

### Goggle

2017 - 2018

Software Engineer

Worked on a **team** responsible for **developing** new features for **Google's search engine**, including improving the accuracy and relevance of search results and developing new tools for data analysis and visualization.

### Facebook

2018 - 2020

Intern

Worked on a **team** responsible for **developing** a new **mobile app feature** that allowed users to create and share short-form **video content**, including **designing** and **implementing** a new user interface and developing the backend infrastructure to support the feature.

### Amazon

2021 - 2023

Software Developer

Worked on a team responsible for developing Amazon's mobile app, including implementing new features such as product recommendations and user reviews, and optimizing the app's performance and reliability.

## EDUCATION

### @University of Lagos (UL)

2016 - 2020

Bsc In Computer Science

Relevant courses included Data Structures and Algorithms, Computer Systems Engineering, and Artificial Intelligence

### @Pan--Atlantic University (PAU)

2020 - 2022

Master Of Computer Science

Completed a master's project on deep learning, developing a new neural network architecture for natural language understanding.

### @Coursera And EdX

2022 - 2023

Online Coursework

Completed coursework in advanced topics such as Reinforcement Learning, Computer Vision, and Machine Learning Engineering

## PROJECTS

### Built a stunning Poet Portfolio Website

I created a **cutting-edge Web3 crowdfunding application with JavaScript & Thirdweb**. This platform allows users to **launch campaigns** for a variety of causes, including **education, hunger strikes, and learning boxes**. Users can donate **cryptocurrency** to support these campaigns, and the funds raised are tracked in real time. This **application**, designed as a marketing funnel, effectively attracts and engages users, thereby enhancing **fundraising** efforts. My **innovative** approach ensures unexpected integration with **blockchain technology**, resulting in a secure and transparent environment for all transactions.
